

INTERCONNECT, INNOVATE, EXPAND

Digital transformation is here, and interconnection is essential to business success in this new era of the digital economy. Equinix puts instant, direct and secure interconnection at the core of your IT architecture to drive innovation, value and growth. Become an interconnected enterprise and discover opportunities that are possible only when companies come together.

Platform Equinix is the global interconnection platform for the world's leading businesses. It's a place to innovate, collaborate and evolve your IT architecture to compete in the digital economy.

Platform Equinix offers:

- Global connectivity you need to re-architect your IT using an interconnection-first strategy that builds on your existing infrastructure and enables new innovation and expansion
- 8,000+ potential partners and customers across borders and industries, making it easy to quickly and securely collaborate and expand wherever you need to be
- 1,400+ network service providers and the expertise to help you identify and build the fastest, safest, lowest latency (< 10 milliseconds) routes worldwide
- 2,500+ cloud & IT service providers offering flexibility, scalability and a broad choice of essential on-demand services
- A rich portfolio of advanced interconnection solutions that help customers accelerate critical business connections in as many ways as possible
- 14 million square feet of data center space inside 145+ sites in 40 global markets that enable customers to be interconnected everywhere they need to be
- Unmatched professional services with the expertise to help you create an interconnected enterprise and run it at the highest levels of efficiency and security
- A long-term commitment to be 100% powered by clean and renewable sources of energy

In the interconnected era, enterprise business models are interdependent and companies forge advantage by collaborating in communities via secure, reliable and internetworked connections.

Platform Equinix enables you to:

- Be local throughout the world with unmatched global reach that brings you inside the top markets on five continents in premium, highly secure facilities
- Be interconnected in dense and thriving industry ecosystems – including cloud, networks, financial services, online advertising, content, and digital media and entertainment
- Be in control by deploying an Interconnection Oriented Architecture™ (IOA™) that directly and securely connects you to the people, locations, clouds and data you need to succeed
- Stay agile and in front of the competition with easy access to the expertise, partners and solutions you need to seamlessly transform IT and evolve to meet the demands of a digital world

The global interconnection platform for the world's leading businesses.

PLATFORM EQUINIX INTERCONNECT, INNOVATE, EXPAND

OUR SECURE AND EXPANDING GLOBAL INTERCONNECTION PLATFORM IS THE PLACE TO ...

TRANSFORM YOUR BUSINESS

Digital disruption is forcing companies to re-architect to eliminate IT silos and become globally distributed and agile interconnected enterprises, connecting users to what they want, when they want, on whatever device they want. An IOA is a proven, repeatable blueprint for becoming an interconnected enterprise, and all of its essential building blocks are on Platform Equinix. We enable enterprises to directly and securely connect people, locations, clouds and data out to the edge of the corporate network. Platform Equinix is where enterprises can transform enterprise IT.

MAKE IT EASY

Platform Equinix has the partners, services and know-how essential to business success, all in one place. It hosts a range of world-class interconnection solutions, including Equinix Performance Hub™, which enables direct, secure connections to network and cloud providers, and Equinix Cloud Exchange™, which gives direct, on-demand, scalable access to cloud services worldwide. Equinix Professional Services supply all the tools to create an interconnected enterprise, including the expertise of our Global Solutions Architects™, thought leaders committed to helping you find the strategies and partners you need to grow your business.

SHORTEN THE DISTANCE

Digital transformation requires the enterprise to get closer to global users, partners and customers at the edge of the corporate network, because only proximity guarantees the secure and high-performance connectivity business now requires. Platform Equinix extends across 145+ data centers in 40 global markets on five continents. You're just milliseconds away from all of the world's top markets.

UNCOVER NEW GROWTH OPPORTUNITIES

Platform Equinix is home to rich business ecosystems, including more than 8,000 companies, 1,400+ network providers and 2,500+ cloud & IT service providers. That means you have choices, no matter where you're headed or how fast your needs change. Equinix enables direct and secure, one-to-one or one-to-many interconnection among partners, customers and potential customers in a variety of industries and markets. We also develop marketplace tools that increase control over your presence on our platform and improve visibility into its ecosystems, enabling more efficient interconnection. As your needs evolve, you'll be interconnected and have the agility and scalability needed to win.

LEAD ON SUSTAINABILITY

Equinix is the largest player in an energy-intensive industry, which gives us an opportunity to lead by example on efficiency and sustainability. We've made a long-term pledge to operate our global data center platform on 100% clean and renewable energy, and this pushes us to constantly search for new ways to reduce our fossil fuel consumption and carbon footprint. We want Platform Equinix to showcase the best ways our industry can conserve our planet's resources and protect our collective future.

UNLEASH VALUABLE INSIGHTS

Platform Equinix empowers your enterprise to build a globally optimized data platform located in strategic data centers worldwide. Putting data close to where it's most needed with Equinix Data Hub™ reduces the demand for expensive network bandwidth and eliminates the risk of exposing data in transit to security attacks. Businesses can accelerate productivity, gain greater insights and maintain full control over business-critical data while meeting growing processing, analytics, security and data sovereignty requirements in the shared digital economy.
